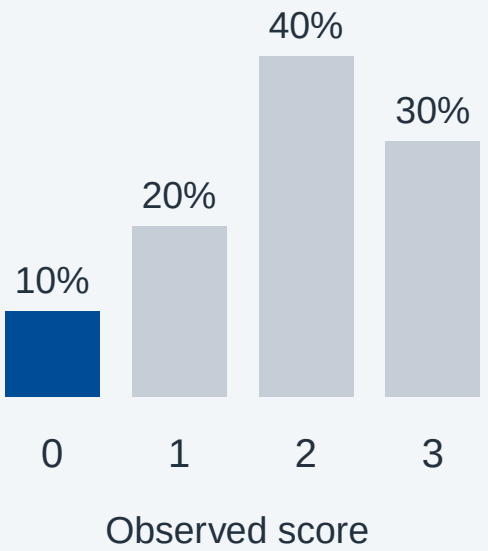
1 Start with the known population

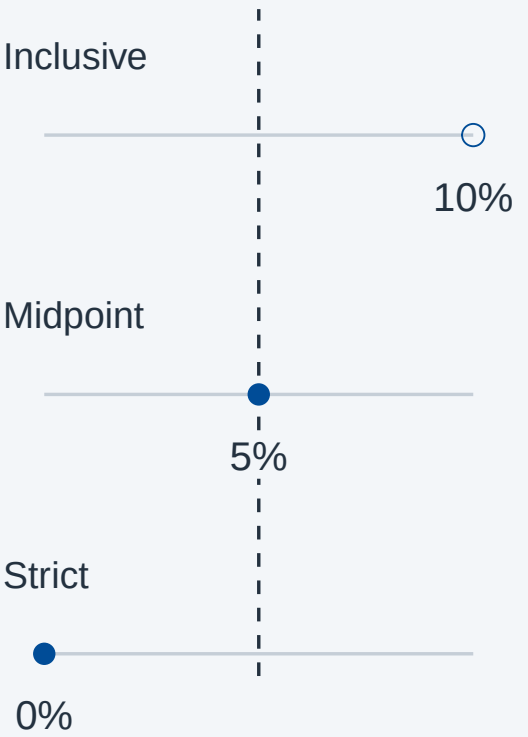
Score probabilities



Score 0 contains
10 of every 100 people.
Track this same group.

2 Assign a rank to score 0

Same tied group



3 Apply the rule; count people flagged

Flag if rank <= 5%

Inclusive: 10% > 5%

Exclude all 10 people

Flagged: 0% of population

Midpoint: 5% <= 5%

Include all 10 people

Flagged: 10% of population

Strict: 0% <= 5%

Include all 10 people

Flagged: 10% of population

Full bar = 100% of people
